

Red Dot, High Temperature NVH Components

- Ultra high temperature compound best suited for **Engine, Radiator, Gearbox & Transmission** applications
- Perfectly suited for Euro 6 & Bharat stage 6 norms
- Life cycle tested to endure over 2 million cycles @ 140°C / 284°F
- Unmatched fatigue & durability
- Durability that drastically reduces costly NVH maintenance in **Engine, Radiator, Gearbox & Transmission** applications
- Extensive product library across various **Engine, Radiator, Gearbox & Transmission** sizes

➤ Over 40% service life when compared with Traditional Polymers

➤ Extraordinary Tensile & Modulus
